# Gerresheimer Kundli supports population

**Düsseldorf, June 29, 2021.** For many years, we have been supporting the local Indian population and society. Especially during the current pandemic, our help is particularly needed. Additionally, we are aware of an increasing racial injustice in India. Therefore, our plant, located in northern India not far from New Delhi, has taken far-reaching measures to support all those who need help.

The two top priorities within our activities are called “Next Generation” and “Community”. To this end, we work closely with local government and private schools to improve their infrastructure and the quality of education by building washrooms, gardens and fences, and creating central water treatment systems. We also provide support through the distribution of stationery, school bags, food parcels, sportswear and school uniforms. Last but not least, we are committed to helping disadvantaged families - this year by donating sewing machines.
